SUMMARY

Site Reliability Engineer and DevOps Engineer with 5+ years running production infrastructure on AWS. Operate a Kubernetes (EKS) platform for 50+ microservices at scale with 99.95%+ uptime, provision clusters with Terraform (Infrastructure as Code), ship via GitOps with ArgoCD, and reduce cloud cost and MTTR through SLO-driven observability.

TECHNICAL SKILLS

Cloud & Networking: AWS (EC2, EKS, ECR, RDS, Lambda, S3, CloudFront, Route 53, ELB, WAF, GuardDuty, CloudTrail, DMS, MSK, Cost Explorer), GCP (VPC, Compute Engine, Cloud SQL, Secret Manager), DNS, TLS/SSL
Infrastructure as Code (IaC): Terraform (modules, S3 remote state, workspaces), CloudFormation, Ansible
Containers & Orchestration: Kubernetes (EKS), Docker, Helm, HPA, VPA, Cluster Autoscaler
CI/CD & GitOps: ArgoCD, Jenkins, GitHub Actions, Woodpecker CI, SonarQube, Trivy
Monitoring & Observability: Prometheus, Grafana, CloudWatch, Alertmanager, PagerDuty, SLOs/SLIs, error budgets
Data & Scripting: PostgreSQL, Apache Kafka (AWS MSK), Debezium CDC, Python (Boto3), Bash, Linux, Git
AI-Assisted Engineering: Claude, ChatGPT, Gemini, AugmentCode, AmpCode for IaC generation, code review and RCA

PROFESSIONAL EXPERIENCE

Superhero Tech Pvt. Ltd. Bengaluru, India
Software Engineer, DevOps *Jul 2025 – Present*

- Designed and operate a Kubernetes (EKS) platform for 50+ microservices with HPA, VPA, Cluster Autoscaler and multi-AZ node groups at 99.95%+ uptime.
- Provisioned 25 production EKS clusters with Terraform IaC (VPC, node groups, IAM/IRSA, add-ons), S3 remote state, DynamoDB locking and per-environment workspaces.
- Authored an org-wide Helm chart library, cutting microservice onboarding from 2+ days to under 30 minutes.
- Established GitOps with ArgoCD (app-of-apps, sync waves, health checks, rollback), removing manual kubectl apply.
- Built Woodpecker CI pipelines (build, test, lint, Trivy, ECR push) with under-8-minute PR feedback across 30+ repositories; added SonarQube and Trivy quality gates to Jenkins, cutting the release cycle by 50%.
- Deployed Prometheus (200+ targets), Grafana RED dashboards, Loki and PagerDuty alerting, reducing MTTR by 35%; hardened AWS security with WAF, GuardDuty, SCPs and CloudTrail for 1M+ monthly users.

Superhero Tech Pvt. Ltd. Bengaluru, India
Software Engineer, Senior SRE *Apr 2022 – Jul 2025*

- Owned AWS infrastructure serving millions of daily API requests against SLO targets: 100+ EC2 instances in Auto Scaling Groups, RDS Multi-AZ PostgreSQL, Lambda, CloudFront, EKS and ECR.
- Architected AWS MSK (Kafka) streaming with Debezium PostgreSQL CDC for sub-second, zero-data-loss replication.
- Designed a high-availability RDS read-replica topology with automated failover, cutting primary DB load by ~40%.
- Engineered Jenkins multi-branch pipelines that raised deployment frequency by 60%; led Blue-Green releases with automated smoke tests for 18+ months of zero-downtime deployments.
- Cut cloud costs 20% (~$50K/year) via Savings Plans, Reserved Instances, Auto Scaling tuning and S3 lifecycle policies.

Treebo Hotels Bengaluru, India
Software Engineer, SRE (Intern Jun – Dec 2021) *Jun 2021 – Apr 2022*

- Built Jenkins pipelines for AWS ECS, EC2 and S3, standardizing deployment of 15+ microservices and cutting manual effort by 70%.
- Instrumented Grafana dashboards and CloudWatch alarms for SLIs (P50/P95/P99 latency, error rate, saturation), improving incident detection by 30%; cut repeat incidents by 25% via blameless post-mortems.

PROJECTS

- **Cost Optimization Dashboard** (*Grafana, CloudWatch, Cost Explorer API, Python/Boto3*) [live demo]: multi-account cost observability by service, team and environment; automated right-sizing cut monthly cloud costs ~20%.
- **Database Migration Automation** (*Python, Boto3, AWS DMS, Debezium, Kafka*) [live demo]: zero-downtime framework that provisions RDS via Boto3, replicates schemas and runs AWS DMS full-load + CDC with Debezium into Kafka.

EDUCATION

B.Tech, Computer Science & Engineering, IK Gujral Punjab Technical University, Jalandhar Jul 2018 – Jun 2022

CERTIFICATIONS & LEADERSHIP

- AWS Educate: Cloud 101, Solutions Architect · Python Training, IIT Bombay · NASSCOM AI Practitioner
- Mentored junior engineers on Kubernetes, CI/CD and cloud cost optimization; hosted ACM Chapter workshops; active in hackathons and innovation sprints.
